## Sample code

```
async function toJSON(url) {
  try {
    let r = await fetch(url)
    if (!r.ok) exception(r.status)
    return r.json()
  } catch (e) {
    error(e)
  }
}

async function readUser() {
  const BR = "<BR>",
    URL = "https://api.github.com/users/"
  let u = await toJSON(URL+usr.value)
  if (!u || !u.login)
    error(usr.value+' not found')
  out.style.color = ''
  out.innerHTML = ''
  let i = document.createElement("img")
  i.src = u.avatar_url
  i.align = "left"
  out.appendChild(i)
  let d = document.createElement("div")
  d.style = "width:200px"
  if(u.name)
    d.innerHTML += "<h1>"+u.name+"</h1>";
  if(u.name)
    d.innerHTML += "<h2>"+u.login+"</h2>";
  d.innerHTML+=u.company+BR
  d.innerHTML+=u.location+BR
  if(u.blog){
    let b = document.createElement("a")
    b.href = u.blog
    b.target = "NewTab"
    b.innerText = u.blog
    d.appendChild(b)
  }
  out.appendChild(d)
}
```
